

Khushi Sharma

AI and Data Developer with experience designing enterprise ETL pipelines, SQL Server databases, and LLM-powered business applications. Skilled in Python, Azure OpenAI, SQL Server, automation, and data engineering. Experienced in developing production-ready chatbot solutions, optimizing data pipelines, and translating business requirements into scalable AI solutions.

WORK EXPERIENCE

AI AND DATA DEVELOPER

CMS Distribution

, Ireland

09/2025 – Present

- Developed and enhanced AI-powered chatbot solutions using Azure OpenAI, enabling employees to retrieve business information through natural language interactions.
- Designed, developed, and maintained Python-based ETL pipelines to ingest, transform, validate, and load inventory, sales, and customer data into SQL Server databases.
- Built Robotic Process Automation (RPA) workflows to automate repetitive business operations, reducing manual effort and improving operational efficiency.
- Automated file processing from SharePoint, Excel, CSV, and other enterprise data sources using Python, minimizing manual intervention.
- Developed SQL Server scripts, stored procedures, and optimized complex queries to improve ETL performance and support business reporting.
- Implemented comprehensive data validation, cleansing, and quality assurance checks to ensure the accuracy and consistency of production data.
- Investigated and resolved production issues, SQL errors, duplicate records, and ETL failures to maintain reliable business operations.
- Collaborated with business stakeholders to understand requirements and translate them into scalable AI and automation solutions.
- Containerized AI applications using Docker to support deployment and consistent development environments.
- Integrated enterprise applications through REST APIs and automated data exchange between internal systems.
- Applied prompt engineering to optimize LLM responses, enhancing chatbot accuracy and AI-driven RPA workflows.

AI AND RESEARCH ASSOCIATE (PART TIME)

Open Health Systems Laboratory (OHSL)

USA

05/2025 – Present

- Contributed to the development of the Digital Newborn AI Framework, leveraging AI to support early childhood cancer risk prediction.
- Applied machine learning techniques to Electronic Health Records (EHRs), population health datasets, and multi-modal biomedical data for predictive modelling and risk stratification.
- Collaborated with international researchers on biomedical AI and digital health initiatives.
- Performed literature reviews and evaluated AI methodologies for healthcare applications.
- Contributed to the Digital Newborn AI Framework for early disease risk prediction.

CYBER SECURITY INTERN

IFSO/CCU Delhi Police Cyber Crime Cell- Central Govt. of India

New Delhi, India

06/2023 – 07/2023

- Studied and applied cybersecurity principles, with a focus on strategies for safeguarding sensitive information and maintaining data integrity.
- Worked under the guidance of professionals to gain deeper insights into cybersecurity concepts and their importance.

EDUCATION

Masters - Software Design in AI

Technological University of Shannon (TUS)

, Ireland

09/2024 – 10/2025

- Specialisation in Artificial Intelligence, with a focus on AI Research, LLM applications, and Generative AI techniques. Coursework includes Natural Language Processing (NLP), AI Ethics, and Machine Learning. Engaged in research projects related to machine learning and real-world problem-solving.

Bachelors - Computer Science Engineering

Amity University

, India

09/2020 – 06/2024

- Focused on Data Structures, Core Computer Science Concepts, and the Fundamentals of AI & ML Research. Coursework included Algorithms, Operating Systems, Machine Learning, and Python. Developed foundational expertise in AI/ML applications, including predictive modeling and data-driven decision-making. Research: Published a Scopus-indexed paper on “Heart Disease Prediction Using Machine Learning Algorithms.”

SKILLS

Python	Machine Learning (ML)	Artificial Intelligence (AI)
AI Model Fine-Tuning	OpenAI API Integration	Problem Solving
Data Pipelines	Docker	Prompting
ETL Pipelines	Data Transformation	Robotic Process Automation (RPA)
Python Automation	MySQL	Pandas
Scikit-learn	SharePoint Automation	REST APIs
API Integration	TensorFlow	PyTorch
Debugging & Troubleshooting		

LANGUAGES

English (Native)		Hindi (Fluent)	
------------------	--	----------------	--

PROJECTS

AI Customer Support Chatbot using Azure OpenAI	ETL Automation Pipeline with Python and SQL Server	Heart Disease Prediction using Machine Learning (Scopus Publication)
Digital Newborn AI Framework (Research)	LLM-based Knowledge Assistant
